

PLASTERING MACHINE

type

BAPRO one MAX

400 Volt

Proudly made in POLAND

If you planning to grow your business based on service for finishing work, as gypsum plaster, cement - lime plaster or smooth floor our plastering machine will be the best solution. Plastering machine type **BAPRO one MAX** 400V is the best mixing pump and sprayer for dry premixed materials. Our machine characterized by unique in design, high-performance work, simple operation, easy to transportation, optimal dimensions outer. Such attributes are the unique characteristic of the BAPRO brand. With this in mind created specifically for you highly efficient plastering unit **BAPRO one MAX**. Now, you can comfortably perform your work at a prominent growth in labor productivity. Applied design solutions and the latest technology will affect the operating cycle and at the same time ensure a long trouble-free operation of

your machine. Operation of the machine is very easy! Just purchase premixed material, then automatically followed the mixing material with water. Ready-mixed mortar is pumped by a high-performance screw pump (stator and rotor), by infeed hose to spray gun. Mortar is sprayed onto the substrate to yield a high rate of job growth while convenience. Construction of the machine allows it to move smoothly because of the 4 wheels rotated around its axis. Ease of transporting the stairs provide three parts of construction and strong transport handles. High quality and aesthetic of equipment will provide easy handling of the spraying operation. Do not delay the decision until tomorrow! Today, make sure that

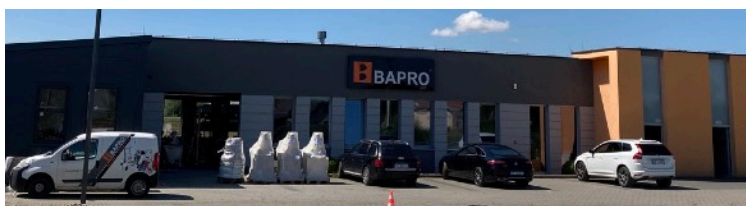

Plastering machine type **BAPRO one MAX** in combination with Pneumatic dry mortar conveying the type of machine **BAPRO 140T**, provide you the best efficiency and comfortable work.

It is an optimal solution for transporting dry premixed materials from a silo.

Dust-free and automatic material is taken from the silo and delivered remotely to the plastering machine.

This type of machine is very helpful at high buildings and large m2 objects because it avoids the problem of wearing bags.

BAPRO Company is a Polish manufacturer of specialized plastering machines, spare parts, and accessories. We produce special machinery for spraying premixed mortars eg.: gypsum plaster, lime - cement plaster, or cement plaster. Designing the machine we take care of the highest levels of components to guarantee their reliability and long stabilization work. We have a range of innovative solutions that provide unprecedented long stable operations. If you appreciate high quality and looking for stabilizing work our machine will be optimal for you!

RECOMMENDED USE

Gypsum plasters

Cement plaster

Cement - lime plaster

Lining plasters (renderings)

Light plasters

Restoration plaster /
renovating

Decorative plasters

Anhydrite floor screeds

BAPRO MACHINE PLASTERING SYSTEM

Plastering machine

Pneumatic conveying system

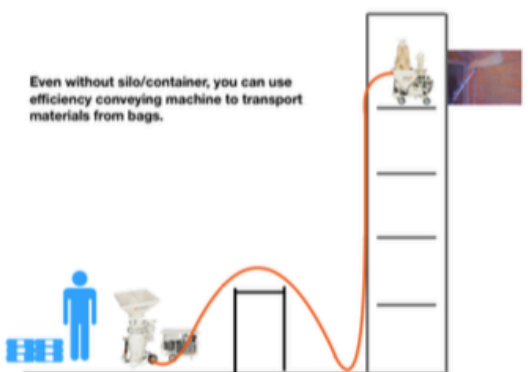

Finishing trowel

→ SUCCESS

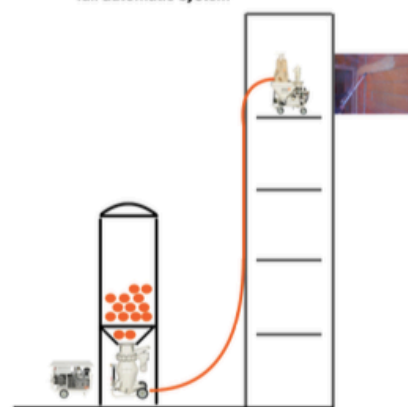

full automatic system

Even without silo/container, you can use efficiency conveying machine to transport materials from bags.

IDEAL FOR LARGE BUILDINGS

Due to mechanical application, which is fast and convenient, we recommended use BAPRO system include a plastering machine plus pneumatic conveying.

**HAPPY
CUSTOMERS**

We provide a lot of thoughtful technical solutions and a lot of square meter per day.

TECHNICAL DATA

- Pumping : variable from 4 to 8 liter per minute
- Distance delivery : to 50 meter
- Power supply: 400 Volts / 50 Hz
- Drives : 2 three-phase motors 400V/ 50 Hz
- Gearmotor 5,5 kW 416 rpm
- Gearmotor 0,55 kW 29 rpm
- Compressor 900 W efficiency 250 l/min
- Dimensions L/W/H:1250/720/1530 mm
- Filing height : 90cm
- Total weight 260 kg

ADVANTAGES !

- high-quality components
 - ease of use and simple design
 - high performance
 - 5 - year warranty
 - wide range of applications
 - operational reliability
 - long distance of mortar conveying
 - easy and safety transport
 - low height of the hopper
 - extensive hopper 130 liters
 - compressor oil-free HANDY K2
 - reinforced geared motors NORD
 - the opportunity to work with such devices
- Pneumatic feeder mortar BAPRO 140T
