

Plastering machine type BAPRO one MAX (400 Volt)

standard equipment:

- stator and rotor for gypsum and cement-lime plasters type BAPRO SILA MAX
- main gearmotor NORD 5,5 kW 416 rpm special edition BAP01
- tilt sensor of main engine (safety)
- infeed wheel gearmotor 0,55 kW 29 rpm special edition BAP02
- compressor oil-free diaphragm-piston HANDY K2 0,9 kW 400 Volts capacity 250 l/min
- compressor pressure switch
- 2 x material hose 25 mm 40 BAR, 10 meter, cpl. with hydraulically fitted couplings male and female rotating cpl.
- 2 x rubber air hose 1/2" 20 BAR, 11 meter included geka-coupling cpl.
- water hose 1/2", 5 meter with spraying nozzle
- cleaning tool and cleaning shaft for cleaning mixing chamber
- water/air fittings with valve to regulation of water 150 - 1500 l/h
- water pump type 50M
- mixing shaft
- long spraying gun 100 cm with round file to spray gun
- 4 rubber, rotatable wheels, including 2 with brake
- power cable 400V 5x4 mm², 25 meter cpl.
- water hose 3/4" 20 BAR included geka-coupling 25 meter cpl.
